We have the antidote for the health care shortage.

Health care is the largest, fastest-growing industry in Texas—and University of Houston is passing new milestones every day to meet the demand. Today more than 25 percent of graduate students and 50 percent of professional students at UH are pursuing health-related degrees.
40% of our sponsored research is around health.

UH has the only optometry school with an ambulatory surgery center in the nation.

We house the largest computer simulation lab in the USA.

100% pass rate for pharmacy licensing exams.

24% of all UH degrees have a pathway to health-related jobs.

UH serves 40,000 vision patients each year.

As a member institution of the Texas Medical Center, UH is well positioned to impact research and education across the state and nation.

We have raised the performance standards for our students. They are surpassing those goals. UH College of Optometry students and graduates rank at or near the top of all schools and colleges of optometry for licensure examination. The UH College of Pharmacy has the highest passing rate in the nation on national pharmacy licensing exams.

The Honors Biomedical Sciences program (HBS) gives undergraduate honor students a direct pathway to the best medical and allied health programs in the region. HBS works in partnership with the University of Texas Health Science Center at Houston, UTMB at Galveston and Baylor College of Medicine.

As a member institution of the Texas Medical Center, UH is well positioned to impact research and education across the state and nation. Our new Health and Biomedical Sciences Center on campus provides 167,000 square feet of clinical, educational and interdisciplinary research space to complement and support advances made at TMC. The University of Houston is well positioned to build for breakthrough.
