## COLLEGE of TECHNOLOGY

### TOMORROW'S HOUSTON WORKFORCE

The University of Houston College of Technology has grown significantly from its 1941 beginnings as a program that provided education and support through the United States Naval Reserve Vocational School. What was initially purposed as a small training school for Hughes Tool Company employees has evolved into a successful multidisciplinary offering, providing the technology industry with graduates of the highest caliber. Currently comprised of 18 degree programs housed in three departments, the college looks forward to continuing to develop and expand its courses and programs to meet the future needs of students and the ever-changing technology field.

### HOUSTON'S REAL TECHNOLOGY CHANGE AGENTS

Graduate and undergraduate students who are members of Cougars for Kids in the College of Technology are mentors to children across Houston through partnerships with Ronald McDonald House Charities®, the Texas Medical Center, local healthcare institutions, each city and county school districts, and more. With the goal of individually logging 50 to 100 volunteer hours a year, students are personally involved with children facing life's biggest challenges. As they prepare for a range of careers in the technology, they make a difference for Houston children every day.

**We offer our students evolutionary education platforms to match changing technology and marketplace demands.**

## TECHNOLOGY FOR LIFE QUALITY

The College of Technology offers degrees through three departments: Engineering Technology, Human Development and Consumer Sciences, and Information and Logistics Technology. A new department, Construction Management, is under development. The diversity of career choices spans the marketplace, from biotechnology to project management, human resources, retail management, and future studies in commerce.

In fact, the College of Technology offers several certificate programs and degrees prepare professionals for 21 out of the 50 Best Jobs in America listed in *CNN Money*, 2010. The college is home to the Center for Life Sciences Technology, focusing on biomedical engineering and bioinformatics for the expanding medical marketplace. Today, the Center offers summer programs for teachers and students in biotechnology, professional courses in workforce development and research resources.

## TECHNICALLY OUTSTANDING

- Designated the National Center of Academic Excellence in Information Assurance Education by the National Security Agency, 2009-2014
- \$250,000 Texas Emerging Technology Fund pre-seed grant to help develop and commercialize a device to track heart failure, 2010
- One of only two Texas project management programs and one of only 24 programs worldwide to receive global accreditation, Global Accreditation Center for Project Management, 2009
