McNICHOLS® Quality Grating - Bar Products

GW Welded Series Grating is our most popular style of the Rectangular Welded Bar Series with standard bearing bar centers of 1-3/16 inch. Standard cross bars are on 4 inch centers and are also available with 2 inch centers. GW Series grating is very versatile and will handle most moderate loads and light wheel traffic. Select from many bearing bar heights and material types with optional serrated surfaces that are slip resistant.

You may narrow your selection choices by using the left navigation pane requirements or browse our stock list below.
