VESSEL FIELD, 2010

Vessel Field is a configuration of vessel-like forms suspended on stainless steel aircraft cable in the glass roof atrium of the renovated Gilman Hall at Johns Hopkins University in Baltimore, Maryland. The forms are constructed out of industrially powder-coated steel hollow tube covered in a white semi-transparent shade cloth. \$350,000.00 budget

RESONANCE, 2010

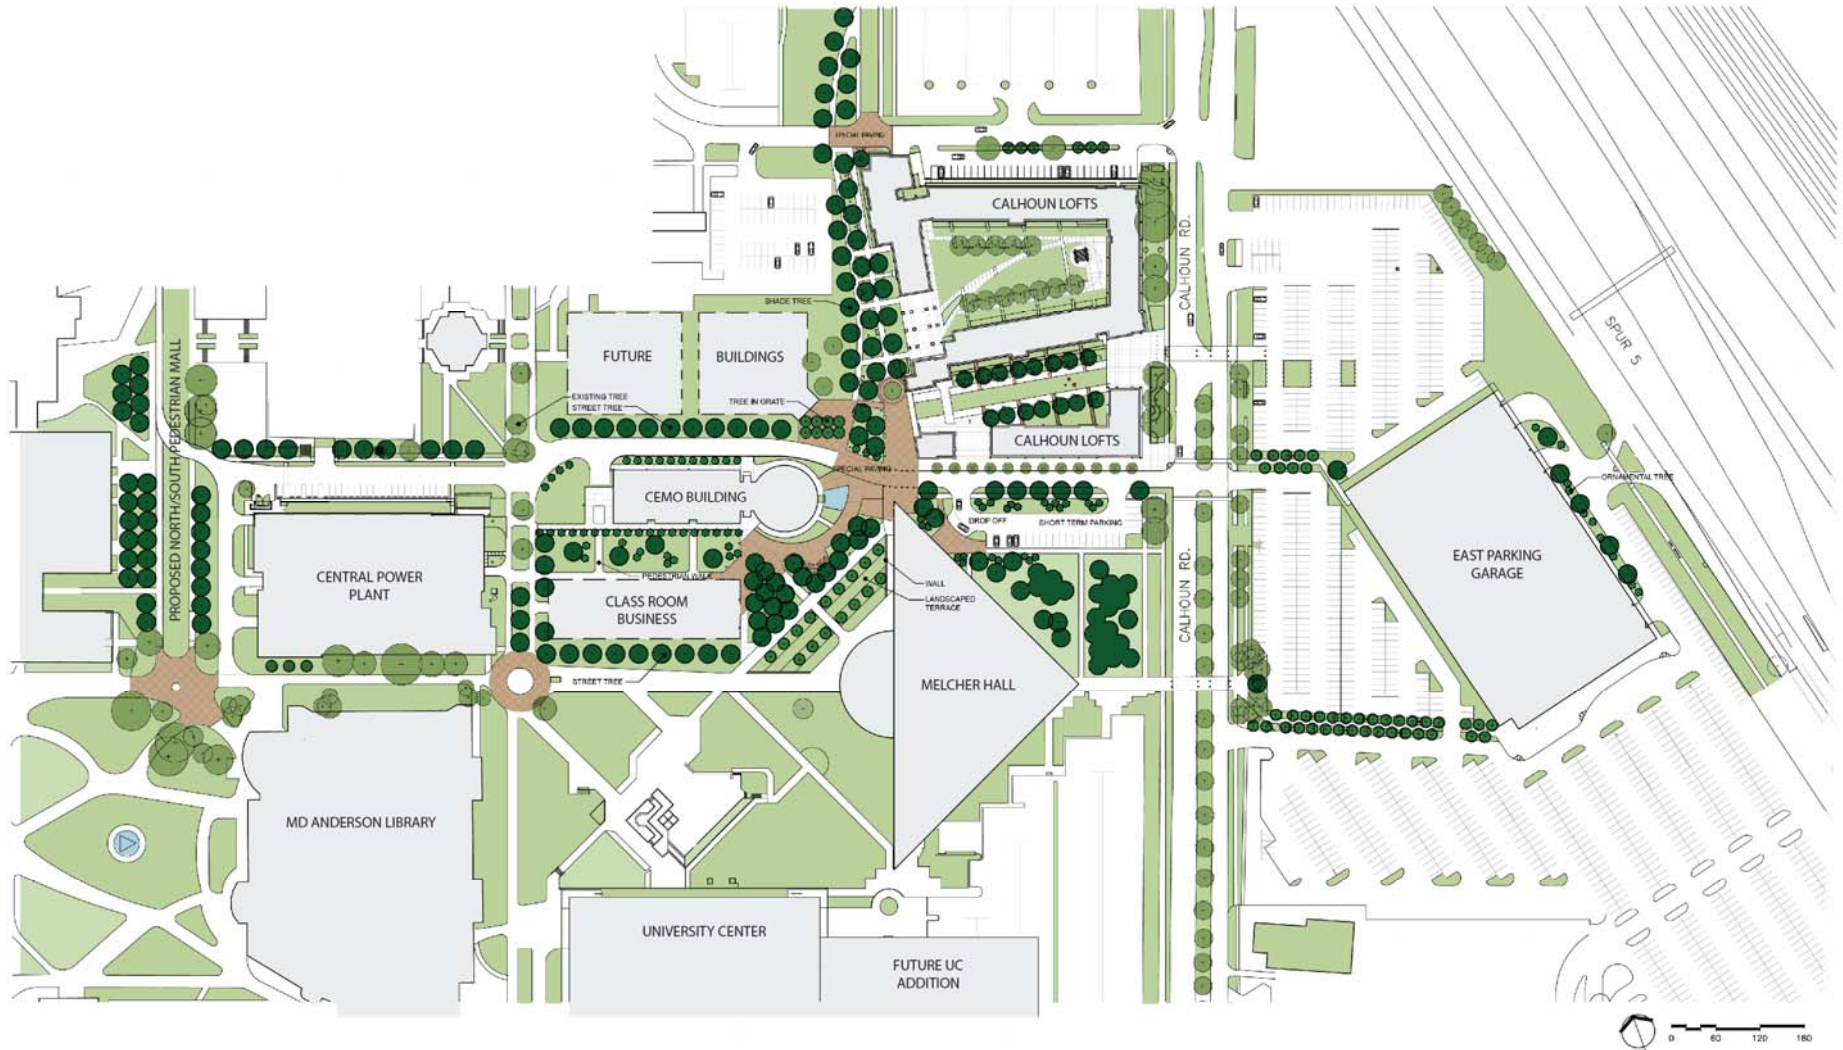

Resonance is a site-specific sculpture commissioned for The Frick Chemistry Lab at Princeton University. It was designed to converse with the particulars of the long and narrow sky-lit atrium space. The sculpture consists of six groupings of ovoid shaped forms suspended on stainless steel aircraft cable and attached to the structural steel beams of the building. Built with lightweight industrially powder-coated steel frames and covered in semi-transparent outdoor shade-cloth
