Portion of Cullen Boulevard to Close Saturday as Generators Are Moved

Houston, Texas, August 9, 2012- The northbound side of Cullen Boulevard, just east of Holman Street, will be closed between the hours of 6:30 a.m. and 4:30 p.m. on Saturday, August 11, 2012. The adjacent sidewalk will be closed off to pedestrian traffic. Metro buses will stop in traffic to load and unload passengers from the bus stop located in the area of Cullen that is being closed off.

Construction crews will be moving two generators that are currently located north of Science and Research 2 to Energy Research Park (ERP). This work will create several sidewalk closures around the areas north of SR2, between SR1 and SR2, and south of SR1.

Satterfield & Pontikes Construction will be bringing in a crane to move the two generators and will be providing flagmen to guide the crane as well as safety observers to make sure the area is clear of any hazards and to keep pedestrians clear of the crane paths.

Please refer to the below drawing for affected areas. The area indicated in blue is where the construction work will be done and the barricades will be located. The line indicated in red is the Cullen Boulevard lane closures and the line indicated in yellow is the sidewalk closure along Cullen Boulevard.

Please contact Emily Eldridge, Project Manager, if you have questions related to this project at eeldrid2@central.uh.edu or by phone at 713-743-5967.
