Opening mail

Mail delivered to UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC sometimes contains credit card payments. Any mail addressed to UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC or addressed to our office without an individual's

name must be opened by a UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC authorized cash handler.

Typically, the cash handler designated to open mail will be someone whose daily responsibilities do not normally include payment processing.

Once a payment is received by mail, the person who received it will hand it off to a cash handler who normally accepts payments, and that individual will process the payment immediately.

Physical security of work and storage areas

The UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC work and storage areas include the Clinic business office. These are security-sensitive areas where cash and confidential information are stored.

Visitors may not be left unattended in any area of the Clinic business offices. When the office is open, visitors must be accompanied by a UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC cash handler.

Doors to the Clinic business offices must be locked when the office is closed and any time staff are not present. If staff must leave the area during business hours, these doors will be locked and signs posted directing visitors how to contact a staff member.

Credit card swipe terminals used to process credit card transactions that are in reach of the public must be visible to our staff at all times. Whenever the office is unoccupied, the doors, in which credit card swipe terminals are located, must be locked. At the end of the day, credit card swipe terminals must be stowed outside public view, if not secured to a counter, for example, and the door(s) to the office area in which the credit card swipe terminals are located must be locked.

All applications open on computers must be closed, and the user logged off the computer before leaving the computer. At the end of the day, the computer should be turned off. Both of these actions mitigate the risk of unauthorized access to this device used to process credit card transactions.

Clean desk policy

Each employee's work area and desk are security sensitive zones where sensitive and confidential information may be stored. Sensitive and confidential information should not be visible on staff desks except when the individual is working with it.

When walking away from your desk temporarily:

- Scan your work area for sensitive or confidential records and store them out of sight.
- Lock your computer desktop so that a password is required to unlock it.
- When leaving the office for any length of time:

- Scan your work area for sensitive or confidential records and store them in a locked drawer or safe.
- Turn off your computer desktop.

Using email

Email is not a secure form of communication. Always assume that unencrypted email and attachments can be read by anyone. The following guidelines will be followed by our staff:

- Do not send sensitive information via unencrypted email.
- Never send confidential information via unencrypted email.
- Never send PCI data via email under any circumstances.
- Do not distribute personal and sensitive information to persons who do not have a legitimate business purpose for having it.

Receiving credit card data via Fax

Cardholder data can be received via fax provided the following conditions are met:

- Fax machines must be stand-alone fax machines. Fax server accounts cannot be used to receive credit card data.
- Fax machines must be physically secured against unauthorized access. Cardholder data is susceptible to unauthorized viewing, copying or scanning if it is unprotected.
- If a transaction cannot be validated immediately, the record may be stored in the safe for up to 1 business day while you gather information or re-attempt validation. After one business day, the record must be securely destroyed as described in this policy.

Cash and credit card handling training program

The UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC supervisor will ensure that cash handlers are cleared through a criminal history background check and receive thorough training in credit card security policy and procedures.

Employees with access to credit card data must sign a statement to acknowledge in writing that they have read and understand the department's security policies and procedures.

- UH Credit Card Processing
- UH Credit Card Data Security

- UH Data Security Training

In addition, the supervisor will review each component of the UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC policies, procedures, and best practices relevant to cash handling and credit card processing with its employees periodically.

Each employee must sign a statement confirming that s/he has read and understands the department's policies and procedures, especially the following:

- The reasons for the security policies
- UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC best practices for securing cardholder data
- Proper step-by-step procedures for job duties that require access to cardholder data

- Credit card numbers
- Card verification values (CVV and CVV2)

If this policy does not include it, then separate, written authorization must be approved by UNIVERSITY SPEECH, LANGUAGE AND HEARING CLINIC management. The employee must in a position classified by the university as security sensitive and have a business need for the data before authorization will be granted.
