So You Are Interested in Design...

Studying architecture + industrial design + interior architecture at the University of Houston

Design Based Curriculum
All incoming students take a required Introduction to Design lecture course and Design Studio I. Each student will have their own desk in the large open studios where they will learn to draw, build models and prototypes, and speculate as they practice design thinking each day. A variety of media are employed in Design Studio I to facilitate multiple forms of design and making including hand drawings, computer-aided drawing, physical model building, and digital fabrication.

To learn more about interior architecture....
An interior architect adapts existing spaces for new uses, designs temporary installations, or develops experiences anywhere. Our program publishes the academic International Journal of Interior Architecture + Spatial Design, which gives voice to the range of practices in the discipline.
