

MS. ROBERT'S CLASS WINS AN ICE CREAM PARTY

Ms. Robert's class won a contest for having the most parents join the PTA. The principal rewarded the class with an ice cream party in the school's cafeteria. Each student received his or her favorite flavor of ice cream. Ms. Roberts put Mark and Sue in charge of finding out what flavors of ice cream they would need to order, and how much of each they would need.

Pam and Linda wanted Cookies and Cream. Joe, Mike, and Robert decided to order chocolate. Carmen wanted Pralines and Cream, and George wanted vanilla. Then Linda changed her mind and decided she wanted Pralines and Cream instead of Cookies and Cream. Mary, Jose, Anna, and Tanika all wanted vanilla. Sam, Mark, Maria, Jeffery and Tom decided they wanted Cookies and Cream and they were going to add M&Ms to it as well. Sarah and Joyce wanted Pralines and Cream and Meredith and Georgia agreed on vanilla since they couldn't make up their minds. Anna, Terry, Barbara, and Kevin agreed on Cookies and Cream, and Ms. Roberts wanted Chocolate.

How many orders of each flavor ice cream will Mark and Sue need?
