

HHP RESEARCH SYMPOSIUM OCTOBER 26, 2015

Please enter & leave only between sessions or during a break

9 -12 Session Sports Administration (Chair: Walsh) & AT (Chair: Knoblauch)		
9:00-9:15	Dr. Don Lee	Perceived meaning of authenticity for professional sport teams
9:16-9:30	Dr. Michael Cottingham	Fusing inspiration & disability sport, perspectives from participants
9:31-9:45	Dr. David Walsh	Using sport as a preferred outlet of physical activity for public health issues
9:46-10:00	Hoyeol Yu	The influence of personality traits on spectator's perception
10:01-10:15	Alex Russell	Development of a model to address athletic identity, coping strategies, & perceived stress of former athletes transitioning into college
10:16-10:30	Dr. Demetrius Pearson	Sport films in the new millennium: A contemporary analysis of "sheroes"
10:31-10:45 Break		
10:46-11:00	Allison Crandell	Vasovagal syncope, grand mal seizures with ventricular pauses
11:01-11:15	Karson Payne	Iliacus avulsion located by symptoms of an iliac crest contusion
11:16-11:30	Matt Barnes	Unique shape of a tibial plateau fracture in an 18-year-old football athlete
11:31-11:45	Nicole Cascia	Common plantar digital nerve pain due to lumbopelvic dysfunctions in a collegiate baseball player
11:46-12:00	Will Ryan	The outcomes of conservative treatment of os trigonum syndrome in an NCAA baseball player

12-1 Session Elevator Speech Contest		
Presenters have 2 minutes to overview their research	Nate Parker	Exercise for patients undergoing neoadjuvant therapy for pancreatic cancer: Understanding adherence, barriers, & facilitators
	Layton Reesor	Summer time blues & childhood weight gain
	Lauren Gulley	Effects of multi-session vibration training on elbow joint position sensing
	Stephanie Silveira	Obesity in mobility impaired populations, future directions
	Priti Gupta	Effect of serum on NK cell cytotoxicity after an acute bout of cycling
	Ram Kinker Mishra	Smart-Phone based technology to detect falls
	David Temple	Why does stochastic resonance not occur in everyone?
	Leo Preteesh	Natural killer cell dysregulation in space
	David Young	Gait assessment in MECP2 Rett Syndrome
	Lyle Babcock	The model cell
Craig Workman	Dual-tasking and automaticity in Parkinson's disease	

1-3 Session TORC (Chair: Hernandez)		
1:00-1:15	Dr. Ledoux	Happier Meals: Teaching parents about responsive feeding through a vicarious learning video
1:16-1:30	Dr. Molly Matthews-Ewald	Predicting weight gain and energy expenditure in men over one year through sitting time
1:31-1:45	Stephanie Silveira	Defining obesity in spinal cord injury: a systematic review
1:46-2:00	Matt Cross	Toddler observation study
2:01-2:15 Break		
2:16-2:30	Dr. Ted Zderic	Impact of high duration light physical activity on insulinemia and lipoprotein particles
2:31-2:45	Nate Parker	Preoperative exercise for patients with pancreatic cancer
2:46-3:00	Saumali Daundasekara	Validity of the intuitive eating scale for pregnant women
3:01-3:15	Layton Reesor	The impact of food insecurity on health behaviors & disease

HHP RESEARCH SYMPOSIUM OCTOBER 27, 2015

Please enter & leave only between sessions or during a break

9 -12 Session LIP (Chair: Simpson)		
9-9:15:00	Dr. Yoonjung Park	Exercise alleviates an aging-induced reduction in blood flow to skeletal muscle
9:16-9:30	Chad Dolan	Effective resistance exercise training for older adults
9:30-9:45	Dr. Thomas Lowder	Exercise improves pulmonary function and bone mineral density in women with Lymphangioleiomyomatosis (LAM)
9:46-10:00	Leo Preteesh	Human Natural Killer cells and simulated microgravity
10:01-10:15	Hawley Kunz	Enhancing adenovirus-specific immunity with exercise
10:16-10:30 Break		
10:31-10:45	Bridgette Rooney	The effects of modeled microgravity on cytomegalovirus replication & virulence
10:46-11:00	Dr. Emily LaVoy	Exercise and the immune system: Implications for health
11:01-11:15	Rachel Graff	Leukocyte response to exercise with β -blockades: mechanisms for mobilization
11:16-11:30	Nadia Agha	Can Exercise be used as an Adjuvant to Hematopoietic Stem Cell Transplant?
11:31-11:45	Break	
11.46-12:45	Poster Session	

1-4 Session CNBR (Chair: Layne)		
1:00-1:15	Dr. Stacey Gorniak	Contribution of tactile dysfunction to manual disability in Type II Diabetes
1:16-1:30	Lauren Gulley	Effects of multi-session vibration training on elbow joint position sensing
1:31-1:45	Dr. Beom Chan Lee	Smartphone-based vibrotactile biofeedback technology for balance training
1:46-2:00	Rakshatha Kabbaligere	Effect of Achilles tendon vibration and visual flow on postural control
2:01-2:15	David Young	Gait assessment in MECP2 Rett Syndrome
2:16-2:30	Stefan Madansingh	Leveraging sensorimotor adaptive generalizability to minimize static & dynamic fall risk
2:31-2:45 Break		
2:46-3:00	Dr. Pranav Parikh	Neural control of dexterous manipulation
3:01-3:15	Ram Kinker Mishra	Identification of postural control features in Parkinson's disease
3:16-3:30	Donya Iranpoor	Can virtual reality be used to induce gait adaptation to novel sensory discordant conditions?
3:31-3:45	David Temple	Vestibular stochastic resonance in a locomotor adaptation task
3:46-4:00	Hao Meng	Postural control and gait stability in obese adults
