SECTION 03 54 16 - HYDRAULIC CEMENT UNDERLAYMENT

PART 1 - GENERAL

1.1 RELATED DOCUMENTS
   A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY
   A. Section includes hydraulic-cement-based, polymer-modified, self-leveling underlayment for application below interior floor coverings.

1.3 ALLOWANCES
   A. Furnish hydraulic-cement-based underlayment as part of underlayment allowance.
   B. Furnish and install hydraulic-cement-based underlayment as part of underlayment allowance.

1.4 UNIT PRICES
   A. Work of this Section is affected by underlayment unit price.

1.5 ACTION SUBMITTALS
   A. Product Data: For each type of product indicated.
   B. LEED Submittals (Projects authorized for LEED certification only):
      1. Product Data for Credit IEQ 4.2: For priming and sealing coatings, documentation including printed statement of VOC content.
      2. Laboratory Test Reports for Credit IEQ 4: For priming and sealing coatings, documentation indicating that products comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."
   C. Shop Drawings: Include plans indicating substrates, locations, and average depths of underlayment based on survey of substrate conditions.

1.6 INFORMATIONAL SUBMITTALS
   A. Qualification Data: For qualified Installer.
   B. Product Certificates: Signed by manufacturers of underlayment and floor-covering systems certifying that products are compatible.
   C. Minutes of preinstallation conference.
1.7 QUALITY ASSURANCE

A. Installer Qualifications: Installer who is approved by manufacturer for application of underlayment products required for this Project.

B. Product Compatibility: Manufacturers of underlayment and floor-covering systems certify in writing that products are compatible.

C. Fire-Resistance Ratings: Where indicated, provide hydraulic-cement underlayment systems identical to those of assemblies tested for fire resistance per ASTM E 119 by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.

1. Indicate design designations from UL's "Fire Resistance Directory" or from the listings of another qualified testing agency.

D. Sound Transmission Characteristics: Where indicated, provide hydraulic-cement underlayment systems identical to those of assemblies tested for STC and IIC ratings per ASTM E 90 and ASTM E 492 by a qualified testing agency.

E. Preinstallation Conference: Conduct conference at [Project site] <Insert location>.

1.8 DELIVERY, STORAGE, AND HANDLING

A. Store materials to comply with manufacturer's written instructions to prevent deterioration from moisture or other detrimental effects.

1.9 PROJECT CONDITIONS

A. Environmental Limitations: Comply with manufacturer's written instructions for substrate temperature, ventilation, ambient temperature and humidity, and other conditions affecting underlayment performance.

1. Place hydraulic-cement-based underlayments only when ambient temperature and temperature of substrates are between 50 and 80 deg F.

1.10 COORDINATION

A. Coordinate application of underlayment with requirements of floor-covering products and adhesives, to ensure compatibility of products.

PART 2 - PRODUCTS

2.1 HYDRAULIC-CEMENT-BASED UNDERLAYMENTS

A. Underlayment: Hydraulic-cement-based, polymer-modified, self-leveling product that can be applied in minimum uniform thickness of 1/4 inch and that can be feathered at edges to match adjacent floor elevations.
1. **Basis of Design Product:** Subject to compliance with requirements, provide K-15 Self-Levelling Underlayment Concrete by Ardex, Aliquippa, PA, or a comparable product by one of the following:
   a. **Bonsal American**, an Oldcastle company; ProSpec Level Set 200. www.bonsal.com
   b. **Dayton Superior Corporation;** LeveLayer. www.daytonsuperior.com
   c. **Substitutions:** See Section 01 25 00 - Product Requirements.

2. **Cement Binder:** ASTM C 150, portland cement, or hydraulic or blended hydraulic cement as defined by ASTM C 219.

3. **Compressive Strength:** Not less than 4000 psi at 28 days when tested according to ASTM C 109/C 109M.

4. **Underlayment Additive:** Resilient-emulsion product of underlayment manufacturer, formulated for use with underlayment when applied to substrate and conditions indicated.

**B. Aggregate:** Well-graded, washed gravel, 1/8 to 1/4 inch; or coarse sand as recommended by underlayment manufacturer.

1. Provide aggregate when recommended in writing by underlayment manufacturer for underlayment thickness required.

**C. Water:** Potable and at a temperature of not more than 70 deg F.

**D. Reinforcement:** For underlayment applied to wood substrates, provide galvanized metal lath or other corrosion-resistant reinforcement recommended in writing by underlayment manufacturer.

**E. Primer:** Product of underlayment manufacturer recommended in writing for substrate, conditions, and application indicated.

1. Primer shall have a VOC content of 200 g/L or less when calculated according to 40 CFR 59, Subpart D.
2. Primer shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."

**F. Corrosion-Resistant Coating:** Recommended in writing by underlayment manufacturer for metal substrates.

1. Coating shall have a VOC content of 250 g/L or less when calculated according to 40 CFR 59, Subpart D.
2. Coating shall comply with the testing and product requirements of the California Department of Health Services' "Standard Practice for the Testing of Volatile Organic Emissions from Various Sources Using Small-Scale Environmental Chambers."
PART 3 - EXECUTION

3.1  EXAMINATION

A. Examine substrates, with Installer present, for conditions affecting performance.
   1. Proceed with application only after unsatisfactory conditions have been corrected.

3.2  PREPARATION

A. General: Prepare and clean substrate according to manufacturer’s written instructions.
   1. Treat nonmoving substrate cracks according to manufacturer’s written instructions to
      prevent cracks from telegraphing (reflecting) through underlayment.
   2. Fill substrate voids to prevent underlayment from leaking.

B. Concrete Substrates: Mechanically remove, according to manufacturer's written instructions,
   laitage, glaze, efflorescence, curing compounds, form-release agents, dust, dirt, grease, oil,
   and other contaminants that might impair underlayment bond.
      installation only after substrates do not exceed a maximum moisture-vapor-emission
      rate of [3 lb of water/1000 sq. ft.] <Insert value> in 24 hours.

C. Wood Substrates: Mechanically fasten loose boards and panels to eliminate substrate
   movement and squeaks. Sand to remove coatings that might impair underlayment bond and
   remove sanding dust.
   1. Install underlayment reinforcement recommended in writing by manufacturer.

D. Metal Substrates: Mechanically remove, according to manufacturer's written instructions,
   rust, foreign matter, and other contaminants that might impair underlayment bond. Apply
   corrosion-resistant coating compatible with underlayment if recommended in writing by
   underlayment manufacturer.

E. Nonporous Substrates: For ceramic tile, quarry tile, and terrazzo substrates, remove waxes,
   sealants, and other contaminants that might impair underlayment bond, and prepare surfaces
   according to manufacturer's written instructions.

F. Adhesion Tests: After substrate preparation, test substrate for adhesion with underlayment
   according to manufacturer's written instructions.

G. Sound Control [Mat] [and] [Board]: Install sound control materials according to
   manufacturer's written instructions.
   1. Do not install mechanical fasteners that penetrate through the sound control materials.
3.3 APPLICATION

A. General: Mix and apply underlayment components according to manufacturer's written instructions.

1. Close areas to traffic during underlayment application and for time period after application recommended in writing by manufacturer.
2. Coordinate application of components to provide optimum underlayment-to-substrate and intercoat adhesion.
3. At substrate expansion, isolation, and other moving joints, allow joint of same width to continue through underlayment.

B. Apply primer over prepared substrate at manufacturer's recommended spreading rate.

C. Apply underlayment to produce uniform, level surface.

1. Apply a final layer without aggregate to product surface.
2. Feather edges to match adjacent floor elevations.

D. Cure underlayment according to manufacturer's written instructions. Prevent contamination during application and curing processes.

E. Do not install floor coverings over underlayment until after time period recommended in writing by underlayment manufacturer.

F. Remove and replace underlayment areas that evidence lack of bond with substrate, including areas that emit a "hollow" sound when tapped.

3.4 PROTECTION

A. Protect underlayment from concentrated and rolling loads for remainder of construction period.

END OF SECTION 03 54 16
