Clinical and Translational Science Awards (CTSA)  
April 8, 2010

Andrea Sawczuk  
Health Scientist Administrator
Each CTSA Institution is a home for clinical and translational science
Impetus for the CTSA Program

To ensure new discoveries lead to improved public health, clinical science must evolve to better:

- Implement biomedical discoveries.
- Develop, test, and bring new prevention strategies into medical practice more rapidly.
- Catalyze change - lower barriers between disciplines.
- Encourage creative and innovative approaches.
Guiding Principles of the CTSA Program

CTSA Philosophy

- Team Science
- Connectivity
- Partnerships
- Collaboration
- Breaking Down Institutional Barriers
Building a National CTSA Consortium

Participating Institutions

- New members 2009
- Members
Working together as a national consortium, CTSA institutions share a common vision to improve human health by transforming the research and training environment to enhance the efficiency and quality of clinical and translational research.

The CTSA initiative is led by the National Center for Research Resources at the National Institutes of Health.
The CTSA consortium has the following five goals:

- Building National Clinical and Translational Research Capability
- Training and Career Development of Clinical and Translational Scientists
- Enhancing Consortium-Wide Collaborations
- Enhancing the Health of our Communities and the Nation
- Encouraging T1 Translational Research
Cultivating Networks: Local Example

Atlanta Clinical and Translational Science Institute at Emory University

- Kaiser Permanente Georgia
- CDC
- Yerkes National Primate Research Center

- Children’s Healthcare of Atlanta
- Emory University
- Morehouse School of Medicine
- Georgia Tech

- Complex Carbohydrate Research Center at U Georgia
- Atlanta VA Medical Center
- Georgia Research Alliance
- Georgia Bio
Cultivating Networks: Local Example

University of California, Davis Clinical and Translational Science Center

UC Davis CTSC

School of Veterinary Medicine

College of Agriculture and Environmental Sciences

College of Engineering

College of Biological Sciences

California National Primate Research Center

UC Davis Cancer Center

Shriners Hospitals for Children—Northern California

Lawrence Livermore National Laboratory

Department of Veterans Affairs Northern California Health Care System
Cultivating Networks: Regional Examples

CTSA Regional Consortia

Chicago C3 Consortium

Northwestern University
University of Chicago
University of Illinois

Upstate New York Consortium

Mary Imogene Bassett Healthcare System
Upstate Medical University
Rochester Institute of Technology
Rensselaer Polytechnic Institute
SUNY Albany School of Public Health
SUNY Health Science Center
Rochester University

University of Rochester
University at Buffalo
Roswell Park Cancer Institute
Cornell University Division of Nutritional Sciences
Guthrie Healthcare System
Binghamton University

KEY
- CTSA Institutions
- Not a CTSA Institution
- East Coast Consortium
- Midwest Consortium
- West Coast Consortium

Consortium operational & committee information

Modules for updates and consortium news
The NIH and CTSA Institutions have established a committee structure to execute the vision and goals of the CTSA Consortium.

The consortium will reach 60 member institutions by 2011.
