teachHOUSTON is a program committed to combatting the shortage of qualified secondary math and science teachers through field-based teaching experiences and is a collaborative project of the University of Houston College of Natural Sciences and Mathematics, the College of Education and school districts in the Greater Houston area.

2017 Program Highlights:

- Approximately $1.6 million in scholarships has been awarded to students in the program.
- Over $6 million earned through grant funding has been allocated towards programmatic goals.
- Students received 500 hours of field-based teaching experiences and professional development before graduation.
- Community Partnerships with 10 area school districts during the 2016-2017 term impacted approximately 6,500 students who experienced hands-on instruction from students in the program.
