RE: Proposal to Change the Repeat Rule

The Curriculum Committee of the College of Natural Sciences and Mathematics has voted (unanimously) to recommend that Undergraduate Council revisit the rule concerning the "repeat rule". Specifically the committee would like the following language removed from the catalog – "When a course is repeated, only the most recent attempt will count toward satisfying degree requirements. This does not mean that the later course grade replaces earlier grades."

Cumulative Grade Point Average

The cumulative grade point average is based upon all work taken at the University of Houston, including courses that are repeated, for which grade point values are assigned.

A repeated course, including courses repeated during a summer session, is equivalent to a new course both in the determination of classification and in computing the cumulative grade point average.

Students may not enroll in any course more than three times, including W, F, and I grades, without permission from the college of their major. When a course is repeated, only the most recent attempt will count toward satisfying degree requirements. This does not mean that the later course grade replaces earlier grades. All attempts will remain on the student's official transcript. This policy does not apply to courses listed in the catalog as repeatable (e.g. Selected Topics courses).
