Mission Statement

Main Street Ministries Houston is a Christ centered volunteer empowered organization focused on effective solutions for those of our community in crisis providing them the opportunity to change their lives for good.

— MSMH Mission Statement

Main Street Ministries Houston’s goal is to provide encouragement, support, and solutions that empower individuals and families to grow to their God given potential and live stable and healthy lives. We are dedicated to assisting persons and families along pathways to self sufficiency. We provide multiple services to assist persons actively engaged along the pathway to self sufficiency by providing (1) emergency assistance to persons experiencing an immediate and documented crisis in employment or income (2) assistance in obtaining identification and (3) weekly spiritual development activities as well as biblically based support and encouragement that provide a foundation to strengthen personal relationships.

The Social Services Department of Main Street Ministries Houston is in the process of designing and developing a spiritually based homelessness prevention program for families. The Program Development & Partnership Intern will work directly with the Social Service Department Program Director in the development phase of this new program. Because of the structure of the organization and the alignment of the program functions, the intern will also work on projects that impact other programs both internally and externally. This will provide the opportunity to practice intra-agency and interagency communication and collaboration with other staff at various levels.

The purpose of this internship is to gain exposure to and experience with multiple levels of program activity in order to understand, with depth, the complexities and considerations of program planning including understanding the foundation of service program design, using data to increase agency ability to identify program/population service needs, and leveraging data to strategically build capacity through partnership. Benefits include gaining first-hand experience with the process of collaborating to increase capacity and using an information management system to drive data driven decision making.

*Perform other duties assigned as related to the learning objectives listed above*

**Job Dimensions/Other Requirements**

The intern will be expected to be present as required at the Main Street Ministries Houston office for 35 hours weekly between Monday and Friday unless otherwise agreed with the Social Service Director. Some duties may be completed remotely. If scheduled events include evenings daily schedules must be adjusted to accommodate 35 hour weekly time requirements. Some travel may be required to attend relevant meetings. The total number of
weekly hours is required however the daily schedule may be adjusted to meet both the intern and program needs. The expectations include the Program Development and Partnership Intern’s demonstration of independent motivation to discover new learning opportunities, clear communication with the Director, compliance with work hour requirements and completion of specified deliverables. Deliverables should demonstrate the student’s thoughtful incorporation of concepts learned through experiences and discussions held while at the placement. The student is encouraged to ask many questions and will work closely with the Director allowing opportunity for ongoing teaching moments.

This internship placement operates in a professional office environment. This role routinely uses standard office equipment such as computers, phones, photocopiers, filing cabinets and fax machines. While this role most often includes sedentary work (desk and phone) some special projects may include physical activity.

**Community Impact/Outcomes & Deliverables**

Understanding the foundation of program planning increases the intern’s breadth of knowledge concerning the Social Service Department’s programs and the logic of the program structure. This is important when communicating the mission, service scope, rationale for the program’s existence and expectation of positive impact on clients to potential community partners. This speaks directly to increasing the opportunity for partnership which (1) builds capacity for clients to be served in a more comprehensive manner also improving their opportunity to meet service goals (2) allows opportunity for community service partners to strategically divert funds that may otherwise have been used to duplicate services to other areas in order to address actual service gaps or unaddressed client and/or community needs.
