Required Text

Some supplementary readings will be offered as well. These will be posted on the web and/or photocopied and presented in class.

Purpose of the Course

This course is designed as an introduction to the basic tools used in analyzing economic phenomena. This introduction includes an overview of the evolution of modern macroeconomics as well as an overview of business cycle theory, growth theory, and monetary economics on a national and international scale. There are no prerequisites for this course however, a knowledge of algebra, with an emphasis on graphical representation, is highly recommended.

Grading

Suggested Homework will be given weekly. This is not for a grade however, feel free to ask question about the problems in class or turn the assignment in for grading.
The grading breaks down as follows
School Brief 10% Midterm worth 30%
In Class Final 30% Take Home Final 10%
The School Brief is one short essay in the style of the school Brief section of the magazine the economist.

Makeup exams

It is departmental policy that if a test must be missed notification must be given before the test occurs. If you must miss an exam then a makeup exam will be scheduled. Supporting documentation is needed to makeup the exam.
Econ 2301: Principles of Macroeconomics
