How does **price matching** work?

The Price Match program matches the prices of any textbook advertised or offered from local bookstores and online retailers (e.g., Amazon). Any price difference is **refunded** to the customer through their original form of payment. The program includes rental, used and new textbooks, saving students even more money.

What are **book adoptions** and how do they affect me?

When colleges and instructors select course materials on time, this allows the bookstore time to search for used, rental, and digital versions which are cheaper alternatives to buying new books.
