

INFORMATION TECHNOLOGY

Avoid Being The Next Big Data Breach News Story!

~

Today, to effectively manage risk, it is necessary to have enterprise-wide visibility into your organization's areas of exposure and an inventory of vulnerable sensitive information.

Find Sensitive Data

Windows , Mac, File Servers, E-Mail

Prevent Data Loss; Protect & Comply

Provided to Students, Faculty and Staff by Information Technology Security, **identityfinder** arms an organization with the intelligence it needs to identify risks and prevent data leakage. With **identityfinder**, managers or administrators can discover sensitive data across an entire organization, generate technical or executive summary reports, and choose whether to remediate centrally or empower employees.
