Subject: CFPC Electronic vote_Solar USB Charger
Date: Tuesday, July 07, 2015 8:08:00 AM

Dear Campus Facilities Planning Committee:

***Your response is requested by 3:00 p.m., Friday, July 10, 2015. A minimum of 7 responses is required to move forward.**

At the June 12th CFPC meeting, the committee reviewed and approved locating a Solar USB Charging Station at M D Anderson, after suggesting a revised location in the M.D. Anderson Library east patio area. The revised location was meant to reduce the potential of the charging station to appear in stark contrast to grass and other landscaping, by grouping it with other hardscape elements. The patio location would also increase the usefulness of the charger by providing seating nearby.

Upon visiting the proposed patio site however, there were too many trees to provide the full sunlight desired for the installation. Two alternate sites were identified, one nearer to the MDA entry and one in the same plaza but nearer to PGH. Both offer opportunities for the charger to meld with the surroundings and for seating

After review of the 2 proposed charger sites, please return your approval or concerns regarding each charger location to Nancy Nguyen. Please forward all questions for clarification to Jeanne La Montagne, Interim Director of Planning Services, FP&C.

Thanks,

Nancy Nguyen
