7. **SUMMARY:**

A mobile classroom sponsored by the College of Technology was approved by the CFPC in January 2016 with a very general location near the "U" in the Technology annex east façade. Upon further site review, and with the approval of the client, the classroom will be located nearer the street, so that the crane and field operations do not destroy the turf, irrigation lines, and underground electrical conduit.

The location has been reviewed and accepted by the Fire Marshal and Parking & Transportation.

This is a student-driven project involving the adaptive reuse of a 20' long shipping container adjacent to the Technology building. The container will be removed in late Spring 2017.
