6. **Summary:**

This item requests approval of exterior elevations for the reconstructed ERP 9B building. This reconstruction, which expands the space for the Petroleum Engineering program at ERP, is faithful to the existing campus vernacular and also continues the design elements employed at the recent 9A renovation.

Massing of the building is also consistent with the original, although the overall height of the building at the exterior walls has been slightly reduced to respond to budget constraints.
7. **Proposed Start Date:** *Upon approval*
8. **Supporting Documentation Description:** *Renderings*
