**Please note:**

Please use the information above as a guide, rather than an absolute representation of what occurs at these institutions.

\* This information was collected out of context -- that is, I did not obtain information about overall campus budgeting that would allow a fuller understanding of this material.

\* Many respondents indicated the distribution of funds to the highest level (for instance, Central Admin and Deans) and then indicated that some of these funds were used to support lower levels (Provost, VP Research and Depts. And Pis) without specifying the actual percentage that flows to these offices. Thus, I believe that the broad distribution between central administration units and academic units are accurate, but the distribution within these units may not be specifically accurate.

\* No information was provided regarding how these funds may or may not be used.

\*\*This is in the process of being revised, \*\* If maximum F&A is not collected PI will not receive 50%
