Mailing Address:
122 College of Architecture Building
Houston, TX 77204-4000

Education

B. Arch., Texas Tech University
M.S. in Space Architecture, University of Houston

Research Interests

My primary focus, as a professional architect, is to provide a personalized service for those who appreciate the necessary unity of *mind and Nature*. Current research is concerned with the evolution of the American democratic ideal expressed through continued experiments in sustainable design. My special projects are experiments for "*the aboriginal spaceship*" which attempts to meld the essentials of democratic aboriginal shelter with those of space architecture such as the international space station. The purpose is to create an architecture that is an appropriate response to the 21st century where architecture must become more than shelter; it must become a life support system and should not only be responsible to the biosphere but free human beings to think more ethically about their true nature in universe.

Current Projects

New Private LEED Residence, Garden & Grounds (design/build)
Wilson Family
Spring, Texas

New Private LEED Residence, Garden & Grounds (design/build)
Baine & Ridings
Nassau Bay, Clear Lake, Texas

New Corporate Office Building
PROMAXIMA Corporation
Houston, Texas

Melinda Bonner Elementary School
Houston Independent School District
Houston, Texas
