

**Are you a social sciences major
interested in learning more about biology?**

**Are you a life sciences major
interested in learning more about sociology?**

Then you should take our new course:

**Sex & Gender
Biology & Society**

Mon & Wed 1:00–2:30PM (Spring 2017)

You will learn about the social psychology and neurobiology of sex and gender, the genetics of sex determination, the social construction of gender, the evolution of sexual dimorphism, gendered institutions, sexual selection, and more!
