

UNIVERSITY CAREERS SERVICES

University Careers Services (UCS) offers a multitude of services to prepare students on their pathway to success by helping them to begin working in their chosen careers. Student preparedness is vital if our scholars are to have success in their job searches. The UCS Career Development Series works with students to better prepare them to gain experience and confidence, while providing in-depth education on career-related topics. Through a variety of opportunities, the UCS Career Development Series provides a platform for students to gain more perspective on potential industries and employers, refine their job search strategies and help with their internships and full-time job searches.

OPPORTUNITIES FOR CORPORATE SPONSORSHIP

Topical Seminar Series (offered twice a semester)

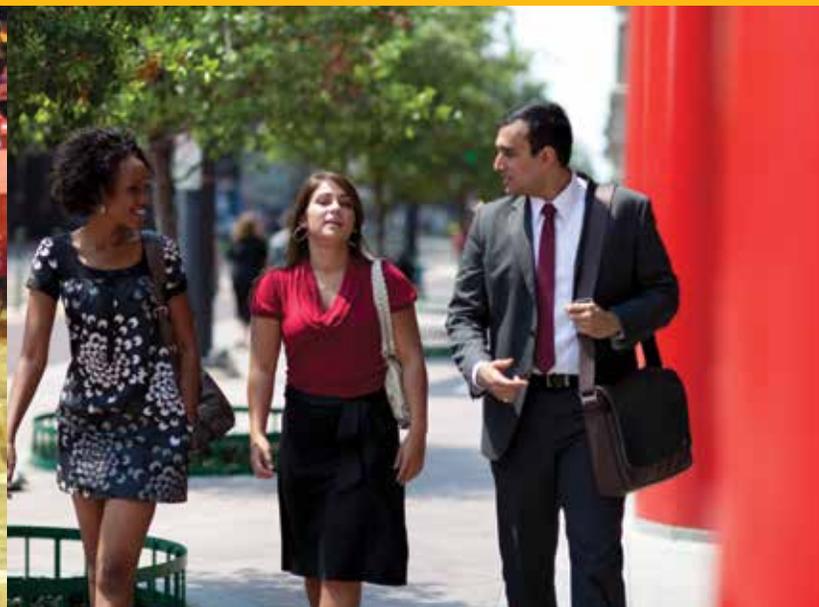

Small group roundtable discussions about a series of topics provide students an opportunity to hear from employers who recruit students. This format offers an opportunity for guest speakers to provide practical advice and a hands-on approach to helping students network and learn what employers look for in their ideal candidate.

Dress for Success Program

Our students have the drive and initiative to pursue their career goals, but many are first-generation students who may not have the economic means to acquire interview attire. The UCS Dress for Success professional clothing program responds to an immediate need. With your donations, we help level the playing field, removing a simple but significant barrier between the client and the workplace. Monetary donations to our UCS fund will

be used to achieve our goal of helping students purchase professional attire.

Networking Social

This social is an informal event to connect employers with students over dinner and a friendly trivia competition.

Networking & Etiquette Dinner

This program offers networking and interaction with students and the opportunity to build our recruiting pipeline through branding opportunities. It also provides a mentoring platform and a knowledge-sharing opportunity for students to learn the “do’s and don’ts” of business etiquette. The UCS staff hosts the evening as everyone learns about dining etiquette. No prior etiquette knowledge required!

UCS Career Development Treks

During the fall semester, the trek travels to Houston’s Energy Corridor, renowned Medical Center, as well as various Fortune 500 companies. The visit typically last

2-2.5 hours, involves a tour of the facilities and small group breakouts or panel presentations, which give students insight into a wide range of industry career paths.

UCS Career Development Graduation and Networking Reception

This closing event celebrates the students and their successful completion of the Career Development Series.

CORPORATE SPONSORSHIP LEVELS

UCS offers the Career Development Series twice a semester and sponsorship opportunities include title sponsor for the entire series or for the individual programs and events listed above.
