Email Settings for Secure Communication to Mail.uh.edu

The following information will help you connect **securely** to UH email server Mail.uh.edu, using a web browser (such as Internet Explorer, Firefox, and Safari) and using email software (such as Outlook, Outlook Express, Thunderbird, Eudora, Mac Mail, and Entourage).

These settings may be **different** than you're using now. Using these settings will connect you securely to Mail.uh.edu.

After **September 30**, 2009, **non-secure** connections will **not** work.

CONNECTING USING A WEB BROWSER

To connect to Mail.uh.edu, go to https://mail.uh.edu .

CONNECTING USING EMAIL SOFTWARE – EMAIL ACCOUNT SETTINGS

Incoming Mail Server

POP Information
POP server name: **mail.uh.edu**
POP server port (SSL): **995**

IMAP Information
IMAP server name: **mail.uh.edu**
IMAP server port (SSL): **993**

Outgoing Mail Server

Outbound SMTP Information
SMTP server name: **mail.uh.edu**

Option 1:
Server port: **587**
(Select either **TLS required** or **TLS, if available**)

Option 2:
Server port: **465** (Select **SSL**)
NOTE: SSL is required on this port.
