

# Grow Student Success in Science!

*Stipends available!*

College of Education  
UNIVERSITY OF HOUSTON

## TEACHER DEVELOPMENT OPPORTUNITY

*Project RESET: Relevant Experiences in Science Education through Translanguaging*

This exciting initiative offers collaborative, meaningful and research-based professional development to middle school science teachers (grades 6-8) who work with emergent bilingual students. This project is a partnership between the University of Houston College of Education and the Alief Independent School District, funded by National Science Foundation.

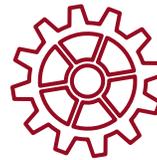

## Program Benefits

Enhance your teaching skills to support emergent bilingual students and all learners.

Join a dynamic research team with fellow middle grades science teachers and UH professors.

Co-develop science units that integrate language inclusive and culturally relevant practices into engineering lessons.

Earn a substantial stipend — up to **\$18,000** for a three-year commitment.

We are also recruiting science specialists to assist for at least \$4,000 a year in stipends.

## Attend a Virtual Info Session

Thursday, March 28, 2024, at 7 p.m.

Saturday, March 30, 2024, at 10 a.m.
