SCIENCE & RESEARCH (SR2) GENERATOR RELOCATIONS

On Saturday, January 7th, 2011, the North bound side of Cullen Blvd. just East of Holman St. will be closed between the hours of 6:00 AM and 6:00 PM. The adjacent sidewalk will be closed off to pedestrian traffic as well. Metro buses will stop in traffic to load and unload passengers from the bus stop located in the area of Cullen that is being closed off.

Construction crews will be moving two generators that are currently located North of Science and Research 2 to areas near their current location. This work will create several sidewalk closures around this location North of SR2.

Satterfield & Pontikes Construction will be bringing in a crane to move the two generators and they will be providing flag men to guide the crane and safety observers to make sure the area is clear of any hazards and to keep pedestrians clear of the crane paths.

Please refer to the attached drawing for affected areas. The area indicated with Orange hatch lines is the areas where the construction work will be done. The line indicated in Red is the Cullen Lane closures with arrows showing the temporary traffic flow. The line indicated in Yellow is the sidewalk closure along Cullen with the blue lines showing where the barricades will be located.

The construction will begin January 7th, 2011 at 6:00AM, and is expected to be completed by 6:00PM.

Please contact Emily Eldridge, Project Manager, if you have questions related to this project at eeldrid2@central.uh.edu or by phone at 713-743-5967.

About the University of Houston

The University of Houston is a comprehensive national research institution serving the globally competitive Houston and Gulf Coast Region by providing world-class faculty, experiential learning and strategic industry partnerships. UH serves more than 38,500 students in the nation's fourth-largest city, located in the most ethnically and culturally diverse region of the country.
