Hi David,

For your team, below is the CDC guidance regarding cleaning and disinfection related to Monkeypox. At this time, the primary discussion has been related to the cleaning of isolation rooms in the residence halls after someone completes their isolation period. I've asked our various medical experts, and at current, they have communicated that there is not a need for widespread enhanced cleaning at this time.

<https://www.cdc.gov/poxvirus/monkeypox/specific-settings/home-disinfection.html>

Thanks,
Kelly
