A215 Pressed with .8mg Fentanyl HCL  
Pictures are real will upload more soon.

dosage is very close to a real oxy should be equal or stronger

Taste and break like reals they are hard not soft like other vendors but a little softer than a real to be honest

they smoke but don't slide well on tinfoil

fentanyl high is different than oxy but close sell as fakes but can easily be passed as real they look on point reals are a little deeper imprinted than mine but I got better dies these are 97% look alike my machine is just not set up just yet
