

## **Addendum to Honors Coursebook Spring 2016**

*Bauer Honors is also offering the following classes:*

### Principles of Financial Management

Instructor: Guez  
Course Number: FINA 3332H  
Class Number: 16896  
Day & Time: MoWe 11:30 A.M.-01:00 P.M.

The Honors section of Finance 3332 will give students an intensive introduction to the principles of finance. In addition, the course will provide students with practical, real-world applications of finance. The course will cover the following topics: time value of money, security valuation (bonds and stocks), capital expenditure analysis, the capital asset pricing model, market efficiency, portfolio theory, cost of capital and capital structure, dividend policy, mergers and acquisitions, and working capital management.

### Introduction to Global Business

Instructor: Aleman  
Course Number: INTB 3354H  
Class Number: 17403  
Day & Time: MoWe 02:30 P.M.-04:00 P.M.

Introduction to Global Business assesses trends over history in the macroeconomic context that shape businesses operating within specific countries and globally. Through this course you will gain an understanding of the global economic landscape, where decisions by governments, in fiscal policy (taxes and spending) and monetary policy (banking and exchange rates), affect international businesses. After completing this course, you will understand concepts such as: the history and current trends of globalization; the economic and political context, and how it shapes international business; and the history and current trends in international trade and international labor forces. *This class counts toward the Global Studies certificate.*

### Capstone Seminar on Globalization

*This class is cross-listed as HON 4360H*

Instructor: Miljanic  
Course Number: INTB 4397H  
Class Number: 25833  
Day & Time: TuTh 11:30 A.M.-01:00 P.M.

See description for HON 4360H, page 44. *This class counts toward the Leadership Studies minor, the Energy & Sustainability minor, and the Global Studies certificate.*

*Please also note:*

Introduction to Global and International Studies (GIS 2350H) is being offered not by Bauer Honors but by Global and International Studies.

*Changes to the Energy & Sustainability program:*

*The Seminar in Energy Efficiency is not being offered in spring 2016, but another ENRG special topic class is:*

Case Studies in Oil and Environment

Instructor: Theriot

Course Number: ENRG 4397

Class Number: 26442

Day & Time: Mo 01:00 P.M.-04:00 P.M.

The challenges of developing oil and gas resources in sensitive environments are increasing. Regions such as Louisiana's Gulf Coast wetlands, the Alaskan tundra, and the Alberta oil sands all have a long history with petroleum production. These areas, particularly coastal Louisiana, offer an engaging study of the complex interactions between energy production and environmental change over time.

For nearly a century, this wetland region has served as the epicenter for U.S. oil and gas production and transportation from the Gulf of Mexico, providing 30% of the nation's energy. Yet this landscape is rapidly disappearing, in large part because of human activities, including oil and gas development. As a result, billions of dollars of critical energy infrastructure located on the water's edge have become vulnerable to changing climatic conditions.

How did oil and gas develop in this sensitive and dynamic environment? Is this critical energy system sustainable? What lessons can be learned and applied to other areas, such as the Arctic?

*INTB 3355: Global Environment of Business also counts toward the Energy & Sustainability minor.*

\*

*Please also note:*

There is a time change to an Honors Engineering class: CHEE 3321H (Chemical Engineering: Analytical Methods) has moved to **MoWe 01:00 P.M.-2:30 P.M.**

Food, Mind, and Soul (HLT 4397): The day and time have changed to **We 01:00 P.M.-04:00 P.M.**
