

## Finding the Mac Address on an XBOX360

- 1 Turn on your Xbox 360 and access the main menu. Locate the "System" tab. It should be the first of four file tabs on the left side of the screen.
- 2 Click on the "System" tab and select "Network Settings." Wait for the Network Settings menu to pop up.
- 3 Select "Edit Settings" from the list of options on the menu. It is the option in the middle of the screen, located directly under the "Test Media Connection option. Wait for the "Edit Settings" menu to come up.
- 4 Select the "Basic Settings" tab and confirm that "IP Settings," located near the top of the page, is listed as "Automatic."
- 5 Click the "Additional Settings" tab at the top of the window and select the "Advanced Settings" box located at the bottom of the screen. Wait for the "Advanced Settings" window to pop up.
- 6 Locate the rectangular box in the bottom left corner of the "Advanced Settings" screen. In this box you will find a 12-digit alphanumeric series. This is the MAC address of your Xbox 360.
