

Be Part of Our Legacy

Join our innovative team of interprofessional experts and share your vast experience and health care knowledge with Fertitta Family College of Medicine students. Preceptors are vital in support of future physicians as they advance their knowledge and understandings across interdisciplinary specialties in both ambulatory and inpatient settings. You can be a catalyst for improving the overall health and health care of the population of Greater Houston, Texas and beyond!

Impact Student Formation

Primary care physicians offer our students the opportunities to learn and grow under their tutelage. The LIC program provides them with real-world experience and the prospect of hands-on learning that is critical in the formation of their medical studies foundation.

Student Expectations

- Perform H&P, SOAP notes, progress notes, and patient presentations
- Assist with procedures
- Participate in patient care activities to facilitate learning
- Learn from and be a part of the interprofessional care team
- Be prompt, professional, respectful, and eager to learn

Physician Partnership

The LIC program requires preceptors specializing in **Internal Medicine, Family Medicine, Surgery, Pediatrics, Psychiatry** and **OB/GYN** looking to mentor students one day a week over the course of 42 weeks through the comprehensive care of outpatients in their integrated learning experiences. We are also seeking inpatient preceptors for 4-week blocks for **Internal Medicine, Surgery, Pediatrics** and **OB/GYN**.

Preceptor Expectations

- Allow students to perform assigned clinical tasks, including history taking and physical examination
- Allow for student involvement in patient care
- Observe, supervise and provide feedback for students
- Complete student performance evaluations
- Provide College of Medicine leadership with feedback for ways to improve the rotation

Preceptor Benefits

- University of Houston Voluntary Clinical Faculty Appointment Status
- Access to UH Medical Library resources
- Grand Rounds, lectures and Continuing Medical Education
- Free subscription to TeachingPhysician.org
- Potential for MOC Credit for teaching (ABFM)
- Unique faculty development opportunities
- Students can assist/participate in QI or research activities

Join us as we train the next generation of medical professionals!
