

How to graph on Excel:

- 1) Go to Excel and select a blank excel page
- 2) In cell 1A and 1B input the name of the date being collected
- 3) Under each named cell input the data collected
 - a) (Example: Height would go in cells 2B, 3B, 4B,.....)

	A	B
1	Daily Cups of Milk	Height (in feet)
2	1	5.58
3	5	5.75
4	3	5.67
5	7	5.72

- 4) Then select all the cells have data in
 - a) (Example: From the spreadsheet above select cells 1-5A and 1-5B)
- 5) Go to the insert tab and under charts select scatter

- 6) Then right click on one of the plotted point and select "Add trendline"
- 7) Now just add a title and label your axes by going to the chart design tab
 - i) Click add chart element
 - ii) Select "Axis title" then "Primary Horizontal"
 - iii) Name the axis then repeat the same but select "Primary Vertical"
 - iv) Now select "chart title" and pick "above chart" and name your graph

****End Result****
