

POLICY TITLE: EVALUATION OF FACULTY AND COURSE

Policy

Students are encouraged to evaluate classroom and clinical instruction. When the **online evaluation** period begins, students will receive an email reminder that lists the courses they can evaluate online at [AccessUH](#) and instructions on how to complete the evaluations and view evaluation reports. Clinical instructors will provide a tool for students to evaluate the clinical experience. In addition, verbal input is welcome.

Evaluations are most helpful when they are honest, fair, constructive and pertinent to the class, clinical experience, or course. Each faculty seriously considers student evaluations in making modifications in the course, specific classes and clinical experience. Evaluation of class, laboratory and clinical teaching effectiveness are used by individual faculty in identifying areas of strength and areas of needed improvement. The faculty value student evaluation of teaching effectiveness as a means of improving teaching skills.

Approved by SON Faculty Council, 12/11/15
