This course provided students with information on pharmacoeconomics, outcomes research, pharmaceutical marketing and pharmacy promotions. The course focuses on the economic aspects of pharmaceutical management.

## **PAST COURSES:**

### ***Statistical Methods and Techniques:***

- Instructed graduate students on methods of advanced multivariate techniques in the Advanced Research Methods course. College of Pharmacy, Idaho State University.
- Assisted faculty in teaching statistical program, SAS, in courses such as Experimental Design, Linear Regression, and Multivariate Statistical techniques for graduate as well as undergraduate students. Department of Mathematics, Idaho State University.
- Conducted a lecture on statistical approaches and techniques in the Clinical Research and Design Course for undergraduate students. College of Pharmacy, Idaho State University.

### ***Nonprescription Drugs:***

- Developed a protocol to include OTC medication counseling procedures in the OTC Drug Laboratory course and assisted faculty during patient-pharmacist role-playing sessions in the laboratory. College of Pharmacy, Idaho State University.
- Conducted a lecture on Rx-to-OTC switches in the Nonprescription Drugs course. College of Pharmacy, Idaho State University.

### ***Pharmaceutical Management and Marketing:***

- Assisted faculty as a teaching assistant during a Pharmacy Management undergraduate course. College of Pharmacy, Idaho State University.
- Organized seminars and conducted lectures for graduate students in Pharmaceutical Management, Marketing, and Pharmacy Administration I & II courses. College of Pharmacy, Idaho State University.

### ***Other Courses and Laboratory Assignments:***

- Involved in developing a ‘Nonprescription Drug Laboratory’ for the College of Pharmacy. This project entailed obtaining products from pharmaceutical companies and local pharmacy stores, involving local pharmacies for future products and equipment, and categorizing products as well as computerizing the laboratory for the next academic year. This laboratory is used by students to get acquainted with new OTC products and learn the process of making

appropriate recommendations during their future practice. The project also involves creating a computer database and developing a system to obtain future data on OTC products.

- Developed, supervised, and conducted a Sterile Products Laboratory. College of Pharmacy, Idaho State University.
- Managed and performed grading of undergraduate Pharm.D. as well as Non-Traditional Pharm.D. courses such as Clinical Research and Design, Drug Information, Nonprescription Drug Laboratory, Pharmaceutical Care, Pharmaceutics I, Pharmaceutics I Laboratory, Pharmaceutics II, Pharmaceutics II Laboratory, Pharmacy Law, Pharmacy Management, Pharmacy Practice Laboratory, Quality Assurance, Therapeutics I, and Therapeutics II.
