

## Check the Cisco AnyConnect VPN Client on DOR issued laptop

1. On the start menu click on the search icon and type in anyconnect to see if any applications pops up

2. If cisco anyconnect is not shown as installed yet, please Contact DAIT for installation

## Check/Installing the Cisco AnyConnect VPN Client on Personal Computers

1. Download the [Cisco AnyConnect VPN Client](#) for Windows installer.

A screenshot of a login dialog box titled 'Login'. The dialog box contains the text 'Please enter your username and password.' Below this text, there are three input fields: 'GROUP:' with a dropdown menu showing 'UHVPN', 'USERNAME:' with the text 'cougar', and 'PASSWORD:' with a masked password field. A 'Login' button is located at the bottom of the dialog box.

2. Enter the **CougarNet** credentials.

3. Click **Login**.
4. Click the **AnyConnect VPN** link to download the software. (Java based auto detection platform does not always work, users may need to manually install.)

5. Double-click the **AnyConnect.exe** file. (Note: You may encounter a Security Warning screen and must click Run to proceed.)
6. Click **Next**.

7. Accept the terms for the **License Agreement**.
8. Click **Next**.
9. Click **Install**.
10. Once the VPN Client is installed and the message below appears, click **Finish**.

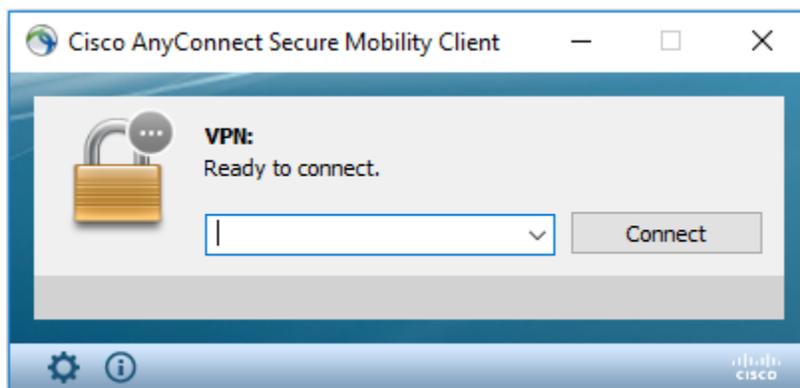

**Note:** If you get a User Account Control screen asking if you want to allow the following program from an unknown publisher to make changes to your computer click Allow or Accept.

## Connecting to the UH VPN

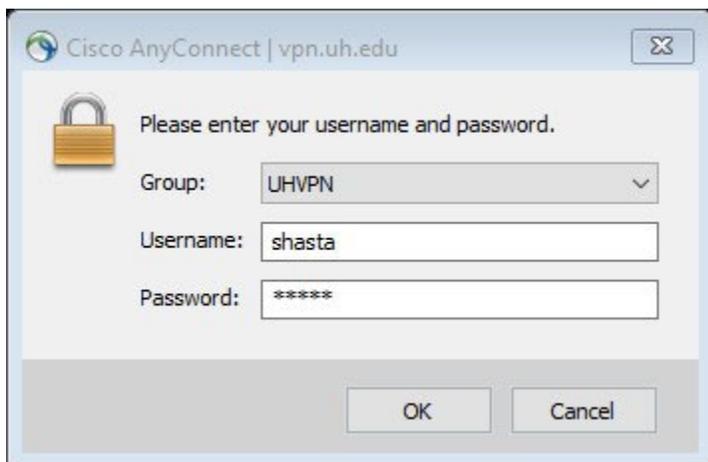

This is for users that need to access UH secure network resources from off campus.

1. Launch the **Cisco AnyConnect Secure Mobility Client**.

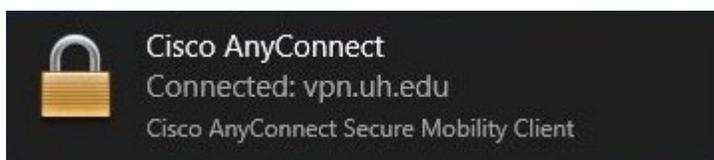

If you don't see **Cisco AnyConnect Secure Mobility Client** in the list of programs, navigate to **Cisco > Cisco AnyConnect Secure Mobility Client**.

2. Type **vpn.uh.edu**.
3. Click **Connect**.
4. Enter the following information and then click **OK**:
  - **Group:** UHVPN
  - **Username:** your COUGARNET ID
  - **Password:** your COUGARNET password

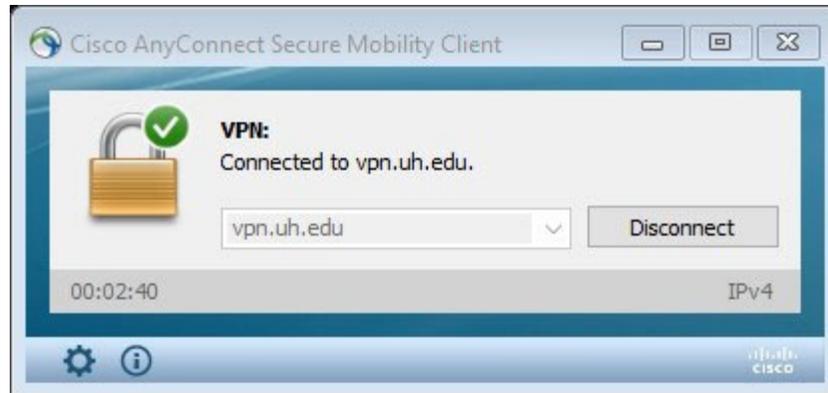

Note: Once the VPN connection is established, a message displays in the lower-right corner of your screen, informing you that you are now connected to the VPN.

## Disconnect from the UH VPN

1. In the notification area, click the Cisco AnyConnect icon if it is displayed. Otherwise, go to your list of programs and click **Cisco AnyConnect Secure Mobility Client**.
2. At the prompt, click **Disconnect**.

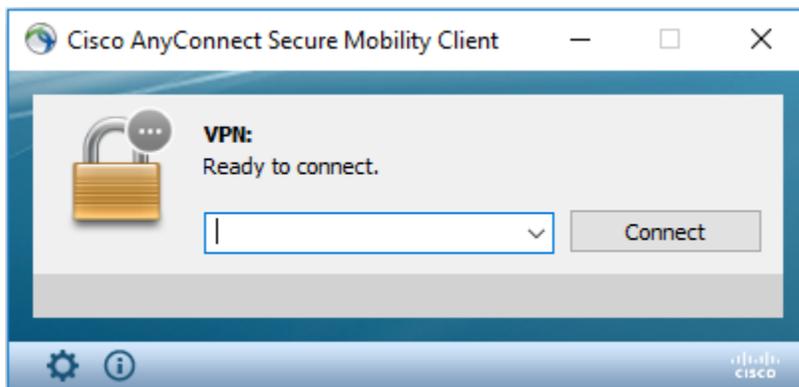

**Note:** If you disconnect from UH VPN you will be required to re-enter your password for reconnections.

## Connecting to the Full UH VPN

This is for users that need to access web-based journals and databases licensed by UH Libraries.

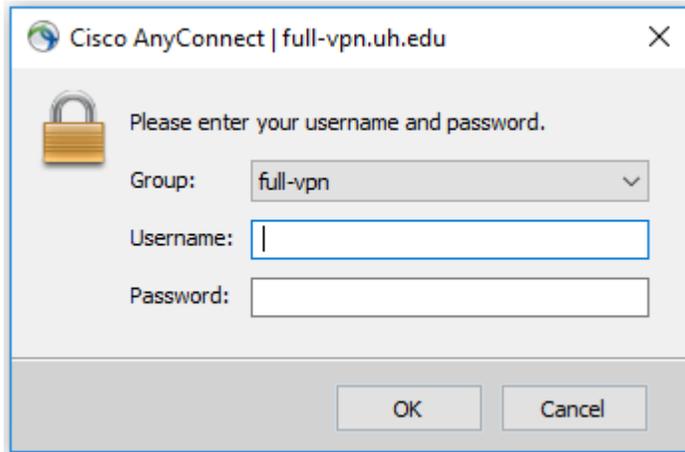

1 Launch the **Cisco AnyConnect Secure Mobility Client**.

If you don't see **Cisco AnyConnect Secure Mobility Client** in the list of programs, navigate to **Cisco > Cisco AnyConnect Secure Mobility Client**.

5. Type **full-vpn.uh.edu**.
6. Click **Connect**.
7. Enter the following information and then click **OK**:

- **Group:** UHVPN
- **Username:** your COUGARNET ID
- **Password:** your COUGARNET password

Note: Once the VPN connection is established, a message displays in the lower-right corner of your screen, informing you that you are now connected to the VPN.
