

INDIRECT COST RETURN

Fiscal Year 2013 IDC Returned in Fiscal Year 2014

Background

State policy provides that earned indirect cost be retained by state colleges and universities. This document provides to operating units the policy for such return.

Policy

- A. When a single department and college are involved, the indirect cost funds returned to operating units are distributed as follows: In the case of multiple principal investigators, multiple departments, or multiple colleges, each unit will participate in accordance with the distribution identified on the appropriate proposal transmittal form.

56% to the college

44% to the department

EXAMPLE: Department X receives 100% credit
IDC Return = \$1000.00

College return equals	\$560.00 (56%)
Department return equals	\$440.00 (44%)

- B. When a single institute, center or laboratory sponsorship of the research project which generated the overhead is involved, the indirect cost funds returned to the operating units are distributed as follows: In the case of multiple principal investigators, multiple centers, or multiple colleges, each unit will participate in accordance with the distribution identified on the appropriate proposal transmittal form.

26% to the college

74% to the institute

EXAMPLE: Institute Y receives 100% credit
IDC Return = \$1000.00

College return equals	\$260.00 (26%)
Institute return equals	\$740.00 (74%)

- C. When both a department and institute, center or laboratory sponsorship of the research project which generated the overhead are acknowledged, the indirect cost funds returned to the operating units are distributed as follows: In the case of multiple principal investigators, multiple centers, multiple departments, or multiple colleges, each unit will participate in accordance with the distribution identified on the appropriate proposal transmittal form.

26% to the college

74% to the institute and department on their portions

EXAMPLE:

Department X receives 50% credit
Institute Y receives 50% credit
IDC Return = \$1000.00

Department portion - \$500.00

Institute Portion - \$500.00

College return = \$130.00 (26%)
Department return = \$370.00 (74%)

College return = \$130.00 (26%)
Institute return = \$370.00 (74%)

Records of earned indirect costs and distribution thereof will be made annually by the Research Information Center. No annual distributions will be made of amounts under \$100.00; if such instances occur, those funds will be placed in the account(s) of the next higher unit.

CALCULATE THE AMOUNT THE ACCOUNT GENERATES

Total Indirect Cost Recovered in FY2013 = \$18,311,434

Bad Debt Payment = (\$1,120,000)

Infrastructure Overhead	= (\$1,238,909)
Annual Bad Debt Reserve	= (\$ 640,900)
Annual Distribution to Central Initiatives Fund	= (\$5,182,136)
Annual Distribution to CORE Facility Support	= (\$ 525,874)

RETURN TO GENERATING UNITS = **(\$9,603,615)**
or **55.863% of Balance for Distribution**

CALCULATE THE ACCOUNT CREDIT SPLITS

Each proposal is logged into the Division of Research database. At that time, the data input operators inspect the Proposal Transmittal Form for credit splits. Each Principal Investigator as well as each academic unit participating in the project is logged into the system. For example, if Dr. Smith is working on a project in ME and EE, then two records will be generated; one record listing Dr. Smith in ME and one record listing Dr. Smith in EE. If Dr. Smith is devoting equal time in both departments, then the amount being returned at the academic level will be 50/50. From the above calculation, ME will receive 50% of the Amount Returned per Account and so will EE.

CALCULATE THE AMOUNT RETURNED

If the academic unit is not an institute or center, then the amount returned per college/department is as follows:

56% to the college
44% to the department

If only an institute or center is involved, then the allocation is as follows:

26% to the college
74% to the institute

If a department and an institute or center are involved, then the allocation is as follows:

26% to the college

74% to the department and institute on their portion
