Department Director

Mayra Olguin
Student Intern

Other Speakers,
To Be Announced

Friday, April 19, 2013

1:00 pm – 4: 00 pm

Location: TBA

The Delivery of Culturally Competent Services through Interdisciplinary Teams

The University of Houston's Graduate College of Social Work invites you to participate in a free educational workshop. As part of a federally funded grant, the GLOBE training program aims to increase the number of bilingual mental and behavioral health clinical social workers. The purpose of this workshop/training session is to promote inter-professional learning through expanding the cross-disciplinary knowledge of practice through the use of an integrated care model. This specific panel discussion will focus on how MHMRA (Mental Health and Mental Retardation Authority) of Harris County ensures the delivery of culturally competent services. MHMRA provides care and support for 15,000 people per month through three service divisions: Mental Health, Intellectual and Developmental Disabilities, and Comprehensive Psychiatric Emergency Programs.
