

Ducks in a Row 

HIPAA & HB300 for Therapists

The Federal compliance deadline is September 23, 2013. Are you ready?

This 3 hour CEU workshop is based on my own research, as a solo private practice therapist, as to what I need to do, know, and have to comply with the HIPAA, HITECH, & HB300 regulations. I will share what I've learned, and offer plain-spoken, *practical guidance* on how I'm doing it.

In this workshop, we will discuss:

- What you should have been doing to fulfill HIPAA already
- Ways that the new HIPAA guidelines are likely to affect the solo private practice therapist
- The ethics of privacy and security
- How Texas HB 300 (the Texas Medical Privacy Act) affects HIPAA & your compliance
- HIPAA versus your professional Code of Ethics
- Typical problems the private practice therapist might encounter (like: email, texting, and compliance documentation)
- Solutions: products, practices, **forms!**, **checklists!**, and more resources that can help.
- This course provides **3 hours Ethics CEU** via the TX Social Work board.
- This course meets the Federal & Texas standards for HIPAA training (req. every 2 years.)

This course gets **Rave Reviews!** *"Katie's ability to take a huge amount of information that is essentially a foreign language and turn it into practical, plain advice for the clinician in private practice is nothing short of a miracle! The checklists & examples are worth their weight in gold."*

"Katie is an amazing trainer who clearly communicates her in-depth knowledge with a sense of humor and a positive attitude. She actually helped me to feel energized and optimistic about incorporating these new requirements in a way that will strengthen and modernize my practice."

Nov. 15, 2013, 1-4pm

**University of Houston-
Downtown**

About Katie Malinski, LCSW. I am a therapist in private practice in Austin, specializing in parenting and kids. *I'm not a lawyer, and can't give legal advice*—but I can explain in simple language what I've learned and what I'm doing. You can read more about me and my clinical work on either of these websites: www.KatieMalinski.com or www.BeyondBirdsandBees.com
