

YouthCount 2.0

YouthCount 2.0! is a community generated research project led by the University of Houston and funded by the Houston Community Foundation to count youth in unstable housing in Harris County.

From October 25 through November 20 an inclusive definition of homelessness will be used to count youth between the ages of 13-24 who are homeless or unstably housed. We will count youth who are staying in shelters or transitional housing programs, those that spent the previous night on the streets, in a car, hotel/motel, vacant apartment, or other place not meant for human habitation. We will also count youth who are currently staying with a friend or non-custodial family member but don't know where they will stay in the next 30 days.

Please refer anyone you know to one of the locations listed below.
Thanks for your help with this important community project.
