

<b>Job Title</b>	Licensed Master Social Worker
<b>Employer/ Agency</b>	Texas Child Health Access Through Telemedicine, Dell Medical School, Dell Children's Medical Center
<b>Job Description</b>	<p>- Dell Medical School is seeking a Licensed Master Social Worker (LMSW) to provide clinical services through tele-mental health as part of the Texas Child Health Access Through Telemedicine (TCHAT) program at UT Health Austin, Dell Medical School. The LMSW will work as part of an interdisciplinary, team-based program which provides services to youth experiencing mental health challenges within a school-based setting. The LMSW will join our growing multi-disciplinary team to conduct behavioral and mental health assessments, treatment planning, brief interventions, and interdisciplinary team consultation as needed. In addition, the LMSW will collaborate with leadership on program development.</p> <p><u>Responsibilities</u></p> <ul style="list-style-type: none"><li>• Under the supervision of an LCSW-S, the LMSW completes a bio-psychosocial assessment of patients. The applied biopsychosocial model and approach will include cognitive behavioral therapy, motivational interviewing, supportive therapy and/or other techniques and modalities as clinically indicated. Completes relative evaluations and treatment plans, and provides individual, family, and group psychotherapy. Participates in screening, tracking, and reporting of patient outcomes and social work interventions. Completes documentation in the clinical record related to interaction with individuals-served, families and other service providers in an accurate and timely manner, and in accordance with professional ethics and with both Federal and State regulations</li><li>• Participates in social work/departmental meetings, continuing education opportunities, academic and research opportunities to optimize patient best practice and interdepartmental collaboration. Provides discipline specific knowledge to interdisciplinary team around mental health, cultural competency, social</li></ul>

determinants of health, and innovative ways to approach chronic illness in patients. Participates in value-based research initiatives and research for patient care operational improvements.

- Provides clinical support for an interdisciplinary team who is responsible for coordinating direct and/or indirect services to school staff, guardians and students. Assists students/guardians/school staff by (a) sharing information and perspectives on how other life factors are affecting mental health or other medical conditions and (b) helping students/guardians/school staff to build coping strategies, psychological skills, and ways to improve daily function and quality of life. Provides care management to include connecting patients to needed resources such as community mental health services, and other resources in the community. Provides support and evidence-based strategies to schools seeking consultation on mental health needs on their campus.
- Assists with the creation, scheduling and promotion of psychoeducational presentations (this includes the planning for in-person and/or virtual events, confirming presenters' availability, creating flyers, etc.). Evaluates, identifies and reports on program processes and makes recommendations to leadership for improvement. Collaborates with leadership on program development opportunities.
- Develops and maintains working relationships with behavioral health providers in the community to create a network of aligned providers. Maintains a highly collaborative approach to a diverse and inclusive cohort of clinical team members, as well as the local, regional and national professional communities.
- Other duties as assigned

<b>Qualifications</b>	<p>Hold a Master of Social Work (MSW) degree from an institutional program certified by the Council on Social Work Education (CSWE). Be licensed as a Licensed Master Social Worker in the state of Texas. Demonstrate the ability to communicate and collaborate effectively with a variety of other health care professionals (i.e., physicians, psychologists, social workers, nurses, physician assistants, physical therapists, dietitians, pharmacists, medical assistants). Maintain a positive, compassionate, and professional attitude when engaging with patients and their family members. Possess excellent interpersonal skills; written and oral communication skills; organizational, planning, follow-up/follow-through, and time management skills. Possess strong analytical and problem-solving skills. Ability to work in a fast-paced, multi-provider practice environment.</p> <p><i>Relevant education and experience may be substituted as appropriate.</i></p>
