Re: Deletion of ECE 5371 from course catalog

The course ECE 5371, entitled "Advanced Telecommunication Systems" is an undergraduate course co-listed with the graduate course ECE 6331 of the same name. ECE 6331 has been updated over the last several years in many respects and now requires ECE 6337, "Introduction to Stochastic Processes," as a prerequisite. Hence, it is no longer appropriate to have an undergraduate course co-listed with ECE 6331. As a result, we have not offered ECE 5371 for the past two years, and we will not be offering it in the future. Since we will no longer be offering this course, it should be deleted from the course catalog.
