EXPLORATORY STUDIES

**The CORE 1101: College Success classes are READY for enrollment!**

***Our most successful students take CORE 1101. Here's why you should take it too!***

For most students, Exploratory Studies gives you a second chance to qualify for your first choice major!

This College Success course is ONLY offered to Exploratory Studies majors, and designed to help you connect to the resources, skills, and strategies that you need to achieve the grades required for acceptance into a new major.

- CORE 1101 classes are small, and instructors come from academic colleges all across campus.
- Friendly undergraduate peer assistants – who themselves started out as Exploratory Studies majors - assist each class and become part of your community by answering questions and sharing their UH knowledge and experiences.
- CORE 1101 will be taught in Fall 2020 as an **online synchronous class** with an instructor AND Peer Assistant ready to teach online in person and help YOU toward that new major!

***Does it help? YES!***

***In addition to developing a warm "homeroom" community in this class:***

Students who take CORE 1101: College Success:

- have a higher average GPA,
- complete a higher number of hours, and
- change to their new major the next semester at a higher rate
- Return to the Orientation Page for specific instructions on how to enroll in CORE 1101. You must search by the section numbers to find these classes.
